 Primers
 Oil Lacquers

WORKS ON:

Street Signs
 Tiles
 Brick
 Metal/Alloys
 Concrete

USED BY:

Transit Authorities
 Schools/Universities
 Municipals
 Painting Companies
 Janitorial Services

ALL PRODUCTS ARE BIODEGRADABLE AND WATER-BASED

Lift Off #4 Spray Paint Graffiti Remover is the first and only Green Cross Certified paint remover. Biodegradable and water-based, this product is safe for people, the environment and every surface. It works more effectively, or better, in the same time, and costs less per ounce than most solvents. Our secret formula actually breaks the molecular bond between the paint and the surface and is effective for removing graffiti from all types of surfaces including stucco, concrete, trucks, and street signs. It provides superior performance on the most difficult porous surface like natural brick and concrete. Lift Off #4 is the first real alternative to anti-graffiti coatings and the continued painting over of graffiti.

HARD SURFACES- Street signs

This **NEW BIODEGRADABLE WATER-BASED** product is designed to work safely on all types of street signs including: reflective, silk-screened, and high intensity and will no damage 3M's 1150 coating. Our product effectively removes all spray paints and permanent markers from surfaces such as: tile, formica, plastic and glass.

SOFT SURFACES- Plastic/Vinyl

Our **NEW USER FRIENDLY PRODUCT** comes in a non-aerosol 22 ounce trigger sprayer that safely removes all forms of spray paint graffiti and markers from surfaces such as: Lexan, Plexiglas, vinyl, plastics, clothing, dry erase boards, blackboards, fiberglass, etc. All this and more without damaging any substrate/surface.

POROUS SURFACES- Concrete/Brick

Our **NEW MULTI-PATENTED FORMULA** works on most/all high poracity substrates including: brick, concrete, stucco, slumpstone, splitrock, etc. The efficiency of our patented formula on high poracity surfaces is increased when used in conjunction with our **PATENTED** process using a high pressure water system.**

Motesenbocker's Advanced Developments, Inc. has made a breakthrough with a new multi-patented formula for spray paint graffiti removal, by developing the first truly biodegradable and water based spray paint graffiti remover ever. Further, Motesenbocker's Lift Off is unlike most green products which claim to be safe, usually don't work and cost more. a lot more!

1. Environmentally Safe 2. User Safe 3. All Surfaces* Safe

Motesenbocker's Lift Off's mission from the beginning has been to develop products which are safe in 3 ways, work better than solvents, and cost the same or less than other products. All this is accomplished through our secret process which actually breaks the molecular bond between the paint and the surfaces/ substrates unlike solvents or d-limonene removers which dissolve paint. MISSION ACCOMPLISHED!

1. Easy 2. Effective 3. Economical

PRODUCT COMPARISON TEST

Product	Test Notes	Signs	Brick	Concrete	Metal	Tile	Stucco
Motesenbocker's Lift Off #4	A	10	10	10	10	10	10
Goodbye Graffiti-Paint	B,C,D,E	2	0	0	0	0	0
Chemco E-Race	E	8	4	6	8	6	4
Goof Off Graffiti Remover	B,C,D,F	4	0	0	0	0	0

Key: 10 = Totally Effective 0 = No Effect

TEST PROCEDURES:

This test was conducted with mild agitation and cloth towel on flat surfaces and with a brush on uneven surfaces such as concrete and stucco.

Each of the painted areas were allowed to set for a 24-hour period.

Many different types of aerosol paints were tested and the results reflect composite scoring.

Test Notes:

- A. Product is water based and biodegradable.
- B. Required hard agitation.
- C. Sprayed on horizontal surface with long sitting time to acquire results.
- D. Product contains dangerous hot solvent chemicals
- E. Dispensing System is neither user friendly or cost effective (it is not a trigger sprayer or an aerosol)
- F. Valve on aerosol container has difficulty in actuation, because of chemical's corrosive properties.
